

How to measure a window

**Approximate measurements are ok. This is for an estimate only.
Final measurements will be made by a professional installer
before ordering windows.**

1. Measure the **width** in inches from the edge of the frame, glass trim or drywall.
2. Measure the **height** in inches from the edge of the frame, glass trim or drywall.
3. Add the **width + height = United Inches (U.I.)**

Example from above illustration

Width 35" + Height 53" = 88 United Inches (U.I.)

1. Pick your window type, click on your window U.I. range and add it to your cart.
2. After all windows have been added to your cart select checkout and print your free estimate.
3. To get the final measurements and to order the windows please send a request to: larry@lvmwindows.com

Any questions please email larry@lvmwindows.com
